TECPRO

BARRIERS®

Protected by Patent

TECPRO is a revolutionnary system of low-wall protection in the go-kart field

SAFETY

- Absorbs more energy than others systems.
- Minimizes equipment breakage and impact on drivers.
- Cancels the boomerang effect.
- Obtains an anti-embedded effect.
- Obtains an anti-slow down effect.

Our efficiency and seriousness is recognized by the international federations and by the CIK and the FIA.

PROFITABILITY

- Space advantage:

Compared to other systems, the TECPRO system is the less voluminous.

- Saving of time:

A 1/2-of-a-kilometer track can be reset by one operator in 15 minutes, whereas 2 hours are necessary with another system,

A 1/2-of-a-kilometer temporary track can be installed by 2 operators in 1 day,

A 1/2-of-a-kilometer permanent track can be installed by 2 operators in 2 days, as comparison the others systems demand several weeks.

- Mobility:

A 1/2-of-a-kilometer track can be reshaped entirely by 2 operators in 1 day, thus you have the possibility to offer easily a brand new track to your customers very often.

TECPRO

BARRIERS®

Protected by Patent

TECPRO is the most adapted barrier for any kind of track

THE TECPRO BARRIERS

TECPRO are low-wall protections made of polyethylene, hollow in the inside, linked together by double nylon straps and tensioned by ratchets system permitting the best absorption during a crash.

TECPRO barriers for go-kart use the same patented tension technology used by the TECPRO barriers for F1.

TECPRO barriers can be shaped perfectly to any curves and turns of race tracks.

TECPRO Barriers do not require necessarily to fix them in the ground.

MODELS AND DIMENSIONS

GO KART

F1: 150 X 120 X 60 CM (F1, cars, moto)

Event: 120 x 80 x 38 (cars and moto events, show)
